SIP SCHOOL UK

opening the door to new business opportunities

The SIP (Structural Insulated Panel) industry in the UK has seen significant growth in recent years, even against the back-drop of the economic recession.

Demand is driven by the need to deliver more sustainable construction solutions and the regulatory drive to reduce in use energy consumption. SIPS provide the ideal building solution to satisfy both of these needs.

SIP SCHOOL provides the opportunity for businesses to rapidly acquire knowledge of how to design and construct using SIPS technology. The Courses on offer will help attendees to be trained in a manner that will allow rapid business diversification, particularly for those businesses that have historically been operating in the Timber Frame industry or using timber frame technology.

SIP SCHOOL is an approved and established training methodology which has been running in the USA for over 10 years. This wealth of experience could be your opportunity to enter the UK SIPS market in a cost-effective and professional manner. Our experienced Course presenters have a wealth of experience in the industry and you will receive the benefit of small classes, tailored to your needs.

SIP SCHOOL is being rolled out across the UK during 2010 - the final SIP School of the year takes place in Coventry in December 2010.

You can sign up now by calling Julie Richards on 01691 860723 or go online at www.sipschool.co.uk and register.

SIP SCHOOL UK – which Course is the right one for you?

Two Courses are being run in December 2010 – presenting opportunities for designers, contractors and project managers to get involved:

ARCHITECTS & DESIGN ENGINEERS – learn about the future of construction techniques:

If you are an Architect or Design Engineer and wish to learn more about the successful application of SIP technology – our 1 day Professional Training Course for Architects and Engineers on **Monday 6th December 2010** will show you how to:

- Economise the cost of design
- Design efficiency
- Maximise space
- Understand SIPS technical issues/benefits

Full Course content can be found at www.sipschool.co.uk/page/course201/

Note: SIP School activity also provides the opportunity to see SIPs in manufacture.

For further information regarding SIP School telephone; 01691 860723 or email; info@sipschool.co.uk and a member of our team will be pleased to help.

CONTRACTORS & PROJECT MANAGERS – why not capitalise on the opportunity to install SIPS products:

If you are a Contractor wishing to use SIPS technology or using SIPS for the first time, or an Installer of Timber Frame wishing to diversify and learn more about SIPS, then why not attend our 4 Day SIP Installer Training Course from **7th – 10th December 2010**.

This intensive 4 day residential course you will help you understand:

- SIP Design
- Tools of the trade
- Basic Engineering
- Manufacturing SIPS
- SIP rigging and lifting
- Sealing the structure
- SIP accessories
- Connection details
- Co-ordination of Installation
